

**AMENDMENTS TO THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims**

1-8. (Cancelled).

9. (Currently Amended) A label for being attached to a main part of the body of a container, said label comprising a foam sheet having an expanded foam layer, in which an outer side of the label is laminated with a non-foam layer and both the foam sheet and the non-foam layer ~~has~~ have linear depressions formed by pressing the foam sheet so as to have partially thinned portions and provide an uneven surface portion.

10. (Previously Presented) The label according to claim 9, further comprising a heat sensitive adhesive layer on an inner side of the label.

11. (Previously Presented) The label according to claim 9, wherein the expanded foam layer is made of foamed polystyrene resin and the linear depressions each have a width of 0.5 - 3.0 mm.

12-14. (Cancelled).

15. (Currently Amended) A label for being attached to a main part of the body of a container, said label comprising a foam sheet having an expanded foam layer, wherein an outer side of the label is laminated with a non-foam layer and both the foam sheet and the non-foam layer ~~has~~ have linear protrusions that are formed by pressing the foam sheet in the thickness direction thereof so as to provide an uneven surface portion.

16. (Cancelled).

17. (Previously Presented) The label according to claim 9, wherein the label is heat shrinkable.

18. (Previously Presented) The label according to claim 10, wherein at least one of a printing layer and an overcoat layer is further provided on the outer side of the label with any one of UV curing ink and electron curing ink.

19. (New) The label according to claim 9, wherein at least a portion of the linear depressions is formed in a lattice pattern.
